📆 Upcoming Features

In-App Messaging Coming to Jumbula Business and Family Apps

Jumbula is releasing an in-app messaging feature in the first half of 2026, allowing direct and group communication within both the **Business** and **My Jumbula** family apps. Staff and families will be able to exchange messages without leaving the platform, while administrators retain control over who can start and join conversations. This addition aims to streamline communication and keep everything connected to registrations and program management in one place.

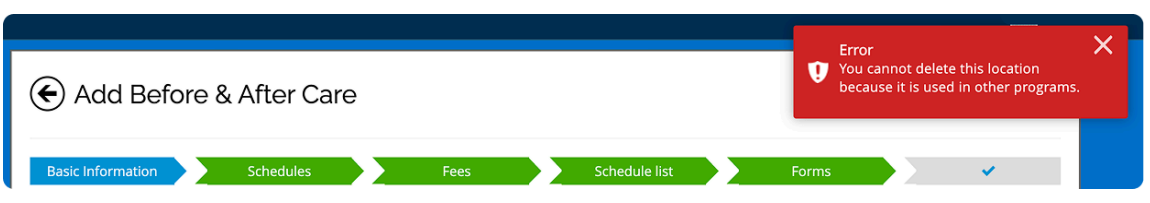
📣 Recent Updates

Enhanced Location Management

We have updated the **Classic Admin Dashboard** to provide more clarity when deleting locations. Previously, if a location had active assignments, the system would simply show an error message.



Now, instead of a generic error, a pop-up will appear showing a detailed list of all activities currently linked to that location. This allows admins to clearly see what needs to be reassigned or removed before deleting the location, eliminating the need for manual searching. From this pop-up, admins can also click **View Program** to open the activity directly and make the necessary updates on the spot.
